

Clipstream™ Video Server

Encode / Host streaming video with your own server based solution

Clipstream™ Video Server: Secure, reliable, powerful software and hardware solution

Clipstream™ Video Server is a complete video streaming software and hardware server system. The Clipstream™ Video Server system allows you to quickly and easily create your own hosted video sharing and streaming community. Easy 1-2-3 "Cliploader" tool allows all users to browse, prepare and upload their video clips. The latest playerless Clipstream™ Video 3.0 Java streaming technology allows viewers to just "click and play". No players, no downloads, unlimited concurrent video streaming. Now you can have your own organization, company, or community streaming thousands of videos to millions of viewers on the web with Clipstream™ Video Server.

The Clipstream™ Video Server components

The Clipstream™ Video Server is in four components: 1) Clipstream™ Video Server software 2) licensed Clipstream™ Video codecs, 3) a new user-friendly "Cliploader" so every community user can easily prepare and upload video clips and 4) a quality new server hardware ready for "plug and play".

Standard features (custom built available)
